

# Milk Run Engineering

A UTS Case Study

## Milk Run Engineering

### Case Study

## What is a milk run?

A **milk run** combines multiple pickups or deliveries into one multi-stop shipment. It can be a very effective way to increase return on your supply chain investment. But it must offer cost savings over individual shipments and meet the requirements of the partners involved.

## Milk Run Engineering

### Case Study

## Family Farm & Home

Retailer Family Farm & Home restocked its stores with LTL shipments from warehouses and key suppliers.

UTS presented a plan to replace these LTL shipments with a schedule of milk run shipments.

### **Result:**

- Cost savings of 4%.
- Much higher operational efficiency at the retail stores from regularly-scheduled deliveries outside of store hours rather than irregular LTL deliveries during store hours.
