

Warehouse Utilization

A UTS Case Study

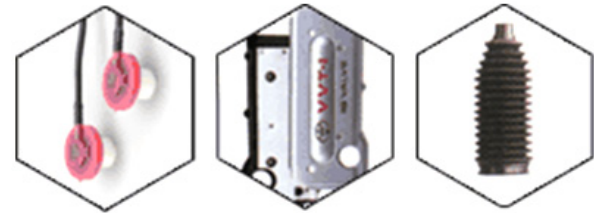

Warehouse Utilization

Case Study

TG Fluid Systems USA

TG Fluid Systems USA Corporation was storing inbound international material onsite. Universal Traffic Service defined and implemented a strategic plan to hold this material at a third-party warehouse instead.

Result: Our solution eliminated \$8,400 of annual direct costs and recovered 10,000 square feet of floor space within the client's manufacturing facility. UTS provides TG Fluid Systems with full visibility of its warehouse inventory and in/out activity.

Warehouse Utilization

Case Study

G&T Industries

G&T Industries operated a warehouse to service a cluster of clients located in northern Indiana. A comprehensive analysis showed that G&T Industries could more efficiently service these clients with well-planned milk runs from its manufacturing locations. UTS designed, implemented, and manages this milk run network.

Result: For an increase of \$42,072 in freight costs, G&T Industries was able to close and sell 60,000 square-foot warehouse.
